

MAKE MONEY, HELP WILDLIFE.

The Wildlife as Canon Sees It ad campaign has run every month in National Geographic Magazine since the 1980s, each month featuring a different endangered species **and** paying photographers for the use of their image. We're helping out with research for the campaign and would *love* to see your pictures. There are some criteria that have to be met for an image to run in the series:

- **The image must be of a wild animal**, photographed in the wild. No leg bands, radio collars, tags, or obvious evidence of humans should be visible in the image.
- The species must be listed as Vulnerable (VU), Endangered, (EN) or Critically Endangered (CR) on the IUCN Red List (www.redlist.org).
- **The species must not have already run in the series** (see following pages for a listing by scientific name.)
- Since Canon doesn't make an underwater housing, underwater images will not be considered.

It takes a little work to put together a submission, but it's worth it. If your image is chosen, a fee will be paid for one-time, non-exclusive usage in the ad, plus limited electronic usage. A photo credit also runs just below the image.

We are currently accepting work for consideration in 2011 (selection will begin in March, 2010).

The submission that gets the most attention...

- Is organized (consistent file names, images grouped by species, labeled with common and scientific names in one way or another)
- Is electronic (jpegs at 600 pixels on the longest side, at 72 dpi are great for our initial selection purposes)
- Comes as either a light box online or as e-mails with no more than 5 mb in attachments per e-mail
- Has six to eight images of each species
- We'll look at everything that is sent to us, but your extra effort to trim out ineligible images will be greatly appreciated. Please **do not send slides**. Since the selection process is lengthy, we're trying to keep it all electronic. Contact us if this is a problem and we can work something out. If you have questions, feel free to email.

We look forward to seeing your work!
